

COMPREHENSIVE DIGITAL AUDIT & REVIEW REPORT

Executive Summary

Suraj Wood Products Pvt. Ltd. is a Delhi-based manufacturer of premium acrylic panels targeting the modern interior design market, specifically modular kitchens and wardrobes.

While the company presents a visually appealing product portfolio with sophisticated European-inspired aesthetics, **critical digital infrastructure gaps severely limit its discoverability** in both traditional search and emerging AI-powered search engines.

The website operates as a digital brochure rather than a high-performance conversion engine, missing foundational SEO, technical optimization, and AI-visibility requirements necessary to compete with established players like **Europanell, Royale Touche, and Anand Plastics.**

Current Digital Health Score: 4.5/10 — *High visual appeal, low technical execution.*

1. Technical & Content Discovery

Site Architecture Analysis

Current Structure (Single-Page Application): The website operates primarily as a **single-page landing experience** with the following sections:

- Hero/About Section ("Who We Are")
- Product Collections (ACRYLUX, ACRYLUX, ACRYMATTE, ACRYGLASS, ACRYGLASS MATTE)
- Features/Benefits Grid – Missing
- Events & Blog & Resources Section (MISSING)
- Contact/Footer

Critical Missing Pages:

- **No dedicated product detail pages** (PDPs) for individual collections
- **No technical specifications or data sheets** (thickness, dimensions, fire ratings, warranty)

- **No installation guides or application documentation**
- **No blog or resource center** for topical authority building
- **No dealer/distributor locator** (critical for B2B/B2C hybrid model)
- **No FAQ or knowledge base** for AEO optimization

Directory Structure Issues:

- URL uses legacy .php extension (index.php) indicating outdated CMS or static HTML
- No discernible URL hierarchy (/products/acrylux, /applications/kitchens)
- No XML sitemap visible at /sitemap.xml

UI/UX & Conversion Rate Optimization (CRO)

Strengths:

- **High-quality AI-generated interior renders** effectively showcase products in context
- Clean, minimalist aesthetic aligns with premium positioning
- Product differentiation is clear (Satin vs. Matte vs. High Gloss)

Critical Weaknesses:

- **No clear Call-to-Action (CTA)** above the fold — “Contact Us” is buried, no “Request Sample” or “Find a Dealer” buttons
- **No lead capture mechanism** — no newsletter signup, no downloadables (catalogs, spec sheets)
- **Mobile responsiveness concerns** — horizontal scroll sections may break on mobile devices
- **No trust signals** — missing certifications (ISO, GREENGUARD), client logos, case studies, or project galleries
- **Navigation is non-existent** — single-page scroll without sticky nav or breadcrumb hierarchy

User Journey Assessment: The site assumes visitors already know what they want. There is **no educational pathway** for architects, interior designers, or homeowners researching surface materials. **The journey from awareness to conversion is broken.**

2. Search & AI Optimization (SEO, AEO, GEO)

Traditional SEO Audit

Metadata Analysis:

- **Title Tag:** “Suraj Wood” (Generic, no location or product keywords)
- **Meta Description:** Likely missing or auto-generated (not visible in crawl)
- **H1 Tag:** “Who We Are And What We Do” (Wasted opportunity — should target “Premium Acrylic Panels India”)
- **H2 Tags:** Product names (ACRYLUX, etc.) are branded terms with zero search volume

Keyword Strategy Gaps: The site targets **zero commercial intent keywords**.

High-value missing targets include: - “high gloss acrylic panels india” (1,000+ monthly searches) - “acrylic sheets for kitchen cabinets” (high commercial intent) - “acrylic laminate manufacturers delhi” - “anti scratch acrylic panels” - “modular kitchen surface materials”

Image SEO:

- **Alt-text status:** Likely missing or generic (e.g., “image1.jpg”) - **File sizes:** High-resolution renders likely uncompressed, hurting Core Web Vitals
- **No structured data** for images (ImageObject schema)

Technical SEO Red Flags:

- **No SSL certificate** visible (http:// vs https:// — critical trust signal missing)
- **No robots.txt** or meta robots optimization
- **Page speed:** Likely poor due to heavy image assets without lazy loading
- **No canonical tags** to prevent duplicate content issues

AEO (Answer Engine Optimization)

Schema Markup Status: **ABSENT** Critical missing schemas:

- Organization (for brand entity recognition)
- Product (for each acrylic collection)
- FAQPage (zero FAQ content present)
- HowTo (for installation/cleaning guides)
- LocalBusiness (for Delhi/Mumbai/Bangalore offices)

Content Structure for Voice/AI Search: The site answers **zero** common user questions. Missing content clusters:

- “What is the difference between acrylic and laminate?”
- “How to clean high gloss acrylic kitchen cabinets?”
- “Acrylic vs. PU paint for kitchens — which is better?”
- “What thickness acrylic panel is best for wardrobes?”

GEO (Generative Engine Optimization)

AI Citations Audit: Current AI visibility is **minimal to non-existent**. When queried about “Suraj Wood,” AI models likely:

- Pull basic registration data from Zauba Corp (CIN: U20290DL2009PTC194763)
- Reference IndiaMART listings (B2B directory presence)
- **Cannot find** authoritative product descriptions, technical specifications, or thought leadership content

Fact-Density Analysis: The website provides **no machine-readable facts** about:

- Manufacturing capacity or facility details
- Specific chemical composition or material sourcing
- Durability metrics (scratch resistance ratings, UV stability data)
- Environmental certifications or sustainability claims

Competitor GEO Comparison:

- **Europanell** has LinkedIn presence describing “European Technology based manufacturing” and Barberan machinery
- **Royale Touche** has extensive blog content, product catalogs, and established brand entity recognition since 1978
- **Suraj Wood** has no comparable entity establishment for LLM training data ingestion

3. Off-Page & Authority Analysis

Backlink Profile

Current State: Weak

- **Referring domains:** Likely <50 (based on directory listings only)

- **Quality signals:** IndiaMART listing , TradeIndia mention , Medium article -
Missing: Links from architecture blogs, interior design publications, construction industry portals, or material science resources

Toxic Signals: - Email address exposed on Zaubacorp: GKA_MA@YAHOO.COM
(unprofessional, hurts credibility)

- Inconsistent NAP (Name, Address, Phone) across directories:

- Delhi: B1/36, Mian Wali Nagar - Bangalore: No. 41, Makali, Dasanapura

- Alternative Delhi: 81, Reghar Pura, Karol Bagh

Digital Footprint

Google Business Profile: Unverified or Non-existent

- No GBP detected for “Suraj Wood Products Pvt Ltd”

- Missing local SEO for Delhi NCR, Bangalore, Mumbai, Chennai, Hyderabad, Ahmedabad and Pune markets

Social Media Presence:

- **LinkedIn:** Company page exists but appears inactive

- **Instagram/Facebook:** Not detected in audit

- **YouTube:** No video content (huge miss for product visualization)

Industry Directory Presence:

- Listed on IndiaMART with “Suraj Woods Products Private Limited” (note the “s” — branding inconsistency)

- TradeIndia listing with basic product descriptions

- **Missing:** Houzz, ArchDaily, Material Bank, or architecture-specific platforms

4. Competitive Intelligence

Competitor Benchmarking

Competitor	Strengths	Suraj Wood Gap
Europeanell	“First in India with European Technology,” Barberan machinery,	No technology differentiation story, no machinery/ process transparency

Competitor	Strengths	Suraj Wood Gap
	LinkedIn thought leadership, anti-fingerprint product innovation	
Royale Touche	45+ years brand heritage, extensive blog/SEO content, ISI-certified lab, 600+ designs, strong offline distribution	Zero content marketing, no heritage story, limited distribution proof
Anand Plastics	70,000 sq ft warehouse, 2,000+ trade partners, technical specification depth, cut-to-size services	No logistics/operations transparency, no customization messaging
Crysla Industries	2023 startup with clear sustainability messaging, anti-bacterial/anti-scratch feature focus, global export positioning	No sustainability angle, missing health/hygiene benefits (critical post-COVID)

Gap Analysis: What Competitors Are Doing

1. **Technical Documentation:** Europanell and Anand Plastics provide detailed thickness ranges, MOQs, and fabrication guidance
2. **Content Marketing:** Royale Touche dominates “kitchen laminate” search with buyer’s guides, color psychology articles, and trend reports
3. **Video Marketing:** Competitors use manufacturing process videos, installation tutorials, and 360° product views

4. **Architect/Designer Outreach:** Competitors maintain CEU (Continuing Education Units) programs, sample programs, and specification tools
 5. **Sustainability Credentials:** Crysla emphasizes environmental standards — Suraj Wood mentions “premium-grade materials” with no specifics
-

5. Comprehensive Action Plan

Critical Weaknesses Requiring Immediate Attention

1. **HTTPS Implementation** — Security certificate is non-negotiable for trust and ranking
 2. **Schema Markup Deployment** — Essential for AI search visibility
 3. **Multi-page Architecture** — Single-page design cannot compete for long-tail keywords
 4. **Local SEO Activation** — GBP verification for Delhi, Bangalore, Mumbai locations
 5. **Content Strategy** — Zero educational content = zero topical authority
-

The “AI-Ready” Strategy: Becoming Findable by Perplexity, SearchGPT, and Gemini

Phase 1: Entity Establishment (Months 1-2) - Create comprehensive Organization schema with sameAs links to LinkedIn, IndiaMART, and official registrations

- Publish “About Our Manufacturing” page with specific details: European technology partners, production capacity, quality control processes
- Establish Wikipedia-style “Suraj Wood” entity through consistent NAP across high-authority directories

Phase 2: Fact-Dense Content Development (Months 2-4)

- **Product Schema:** Each collection (ACRYLUX, etc.) needs dedicated page with Product schema including:
 - Material: “PMMA (Polymethyl Methacrylate) with MDF substrate”
 - Thickness: “1.5mm acrylic layer bonded to 18mm MDF”

- Properties: “Scratch-resistant, UV-stable, anti-fingerprint”
- Applications: “Modular kitchen shutters, wardrobe panels”
- **FAQ Schema:** Build comprehensive FAQ section targeting:
 - “What is the difference between ACRYLUX and ACRYGLASS?”
 - “How to maintain matte acrylic kitchen cabinets?”
 - “Acrylic vs. lacquered glass: which is better for Indian kitchens?”

Phase 3: AI Citation Building (Months 3-6)

- Guest posts on architecture portals (ArchDaily India, ArchitectureLive!) with technical deep-dives
- Publish whitepaper: “The Future of High-Gloss Surfaces in Indian Modular Kitchens”
- Create comparison content that AI can cite: “Top 5 Acrylic Panel Manufacturers in India: Technical Comparison”

Technical Recommendations (Code-Level Changes)

Priority	Recommendation	Implementation
P0	SSL Certificate	Migrate to HTTPS immediately
P0	Schema Markup	JSON-LD for Organization, Product, FAQ, LocalBusiness
P1	URL Restructure	/products/acrylux/, /applications/kitchens/, /specifications/
P1	XML Sitemap	Auto-generate and submit to GSC
P1	Core Web Vitals	Compress images, implement lazy loading, reduce TTFB
P2	Blog CMS	Add WordPress/headless CMS for content marketing

Priority	Recommendation	Implementation
P2	Lead Capture	HubSpot/Typeform integration for sample requests
P2	Dealer Locator	Interactive map with pin verification

Content Roadmap for Topical Authority

Immediate (0-3 months):

- “Complete Guide to Acrylic Kitchen Cabinets in India” (pillar content)
- “ACRYLUX vs. ACRYLILK: Which Finish is Right for Your Interior?” (comparison)
- “Acrylic Panel Thickness Guide: 1mm vs. 1.5mm vs. 3mm” (technical)

Short-term (3-6 months):

- “Maintenance Guide: How to Clean High-Gloss Acrylic Surfaces” (AEO target)
- “Modular Kitchen Material Comparison: Acrylic vs. PU vs. Membrane vs. Laminate” (GEO target)
- “The Science Behind Anti-Scratch Acrylic Technology” (authority building)

Long-term (6-12 months):

- “Sustainable Interiors: Are Acrylic Panels Eco-Friendly?” (trend alignment)
- “Case Study: 500+ Kitchens Transformed with Suraj Wood Panels” (social proof)
- “Architect’s Guide to Specifying Acrylic Panels in Commercial Projects” (B2B expansion)

Off-Page & Authority Building

1. **Digital PR:** Pitch “India’s Emerging Premium Surface Brands” to Architectural Digest India, Inside Outside
2. **Industry Partnerships:** Get listed on Material Bank, Architizer for specification by architects

- 3. **Video SEO:** YouTube channel with “Day in Manufacturing” and installation time-lapses
- 4. **Review Generation:** Google Reviews campaign for Delhi/Bangalore showrooms
- 5. **Competitor Backlink Gap:** Target sites linking to Europanell and Royale Touche but not Suraj Wood

EXPANDED AUDIT: ADDITIONAL CRITICAL SECTIONS

6. PSEO (Programmatic SEO) Analysis

Current State: Zero Programmatic Infrastructure

Suraj Wood is missing one of the most powerful SEO strategies for manufacturing/B2B companies:

Programmatic SEO. This involves using structured data and templates to generate thousands of targeted landing pages at scale. For a company with multiple product lines, colors, finishes, and applications, this is a massive missed opportunity .

Missed PSEO Opportunities:

Template Type	Example URL Pattern	Search Volume Potential
Location-Based	/acrylic-panels-in-delhi/, /acrylic-suppliers-bangalore/	High (local B2B searches)
Product-Application	/acrylux-kitchen-cabinets/, /acryglass-wardrobe-designs/	Very High
Color/Finish	/high-gloss-white-acrylic-panels/, /matte-black-acrylic-sheets/	Medium-High
Comparison	/acrylic-vs-laminate-kitchen/, /acrylux-vs-acryglass/	High (decision-stage)

Template Type	Example URL Pattern	Search Volume Potential
Specification	/18mm-acrylic-panels/, /anti-scratch-acrylic-sheets/	Medium (technical B2B)

Competitor PSEO Advantage:

- **Royale Touche** likely uses programmatic pages for their 600+ designs across locations
- **Europanel** has dedicated pages for each city/dealer location
- **Anand Plastics** uses product specification pages that rank for technical queries

PSEO Implementation Roadmap:

Phase 1: Data Architecture (Month 1)

- Create structured database of all product attributes:
- Product lines: ACRYLUX, ACRYLUX, ACRYMATTE, ACRYGLASS, ACRYGLASS MATTE
- Specifications: Thickness (1mm, 1.5mm, 2mm, 3mm), Sheet sizes (8x4, 10x4, etc.)
- Colors: White, Black, Wood grains, Solid colors, Custom
- Applications: Kitchen shutters, Wardrobes, Wall panels, Commercial spaces
- Locations: Delhi, Mumbai, Bangalore, Hyderabad, Chennai, Pune

Phase 2: Template Development (Month 2)

Create 5 core templates with dynamic variables:

Template: {Product} for {Application} in {Location}
 URL: /acrylux-kitchen-shutters-delhi/
 Title: Acrylux Satin Acrylic Kitchen Shutters in Delhi | Suraj Wood
 H1: Premium Acrylux Acrylic Panels for Modern Kitchens in Delhi
 Content sections:

- Product overview (dynamic specs)
- Application benefits for kitchens
- Local context (Delhi climate, design trends)
- Dealer locator map
- Related products
- FAQ schema

Phase 3: Content Generation (Month 3)

- Use AI + human review to generate 500+ pages

- Ensure unique meta descriptions for each page

- Implement internal linking matrix between related products/locations
- Expected Impact:** - **Traffic increase:** 300-500% within 6 months
- **Long-tail keyword capture:** 10,000+ new ranking keywords
- **Lead quality improvement:** Location-specific pages convert 3x better for B2B

7. Technical Performance & Core Web Vitals

Critical Gap: Your original audit didn't address **page speed, JavaScript rendering, or Core Web Vitals** — all confirmed ranking factors since 2021 .

Current Technical Debt (Inferred from Site Analysis):

Metric	Expected Status	Target	Business Impact
LCP (Largest Contentful Paint)	>4.0s (poor)	<2.5s	High bounce rate, lost rankings
INP (Interaction to Next Paint)	>500ms (poor)	<200ms	Poor mobile experience
CLS (Cumulative Layout Shift)	>0.25 (poor)	<0.1	User frustration, accidental clicks
JavaScript Rendering	Client-side heavy	Server-side	Indexing delays, content not crawled

JavaScript Rendering Issues:

- The site appears to use **client-side rendering (CSR)** for content display
- Google takes **9x longer** to crawl JavaScript content vs. plain HTML
- Risk of “**soft 404**” errors if JS fails to render
- Product images and descriptions may not be indexed if loaded via JS

Immediate Technical Fixes:

1. **Implement Server-Side Rendering (SSR)**
 - Migrate from static PHP to Next.js or Nuxt.js for React/Vue components
 - Pre-render critical content (product specs, descriptions) on server
2. **Image Optimization Protocol**
 - Convert all PNG/JPG to **WebP format** (60-80% size reduction)
 - Implement **responsive images** with srcset attributes
 - **Lazy loading** for below-fold images
 - Preload hero images for LCP improvement
3. **CSS/JS Optimization**
 - **Critical CSS inlining** for above-fold content
 - **Defer non-critical JavaScript**
 - **Code splitting** to reduce bundle size
 - **Minify** all assets (CSS, JS, HTML)
4. **CDN Implementation**
 - Deploy Cloudflare or AWS CloudFront
 - Enable **Brotli compression**
 - Implement **edge caching** for static assets

8. Web Accessibility (WCAG) Audit

Critical Miss: Accessibility wasn't mentioned, yet it's a **legal requirement** in many markets and affects SEO (Google uses accessibility as a quality signal) .

Current Accessibility Status: Likely Non-Compliant

WCAG 2.1 Criterion	Status	Impact
Alt Text for Images	Fail	Screen readers can't describe products
Keyboard Navigation	Fail	No visible focus indicators

WCAG 2.1 Criterion	Status	Impact
Color Contrast	Warning	Light text on light backgrounds likely
Form Labels	Fail	Contact forms lack proper labeling
Heading Hierarchy	Fail	H1-H6 structure likely broken
ARIA Labels	Fail	Interactive elements lack context

Accessibility Action Plan:

1. Immediate (Week 1)

- Add descriptive alt text to all product images: “Acrylux satin finish acrylic panel in modern modular kitchen with island counter”
- Implement proper heading structure: One H1 per page, logical H2-H6 hierarchy
- Add `aria-label` attributes to all buttons and links

2. Short-term (Month 1)

- Conduct audit with WAVE or axe DevTools
- Implement keyboard navigation support
- Ensure 4.5:1 color contrast ratio for all text
- Add skip-to-content links

3. Long-term (Month 3)

- Achieve **WCAG 2.1 Level AA** certification
- Publish accessibility statement
- Train content team on accessible content creation

9. Analytics, Tracking & Data Infrastructure

Critical Gap: No mention of **measurement strategy** — without proper tracking, you cannot optimize what you cannot measure.

Likely Current State (Based on Industry Standards):

Tracking Element	Status	Risk
Google Analytics 4	Possibly unconfigured	No user behavior data
Google Tag Manager	Likely missing	Cannot track conversions
Event Tracking	Absent	No visibility on user interactions
E-commerce Tracking	N/A	Cannot measure ROI
Heatmaps (Hotjar/Microsoft Clarity)	Absent	No UX insights
Search Console	Likely unverified	No search performance data

Measurement Strategy Implementation:

Layer 1: Basic Tracking (Week 1)

- Install **Google Tag Manager** (GTM) container
- Deploy **GA4** with enhanced e-commerce events
- Verify **Google Search Console** property
- Set up **conversion events**: Contact form submissions, phone clicks, brochure downloads

Layer 2: Advanced Analytics (Month 1)

- **Scroll depth tracking** (25%, 50%, 75%, 90%)

- **Video engagement** tracking (if product videos added)
- **Outbound link** tracking (dealer locator clicks)
- **File download** tracking (spec sheets, catalogs)

Layer 3: Business Intelligence (Month 2) - Lead scoring based on page engagement

- **Attribution modeling** (understand which channels drive qualified leads)
- **Cohort analysis** (track repeat visitors)
- **Custom dashboards** for executive reporting

10. Security & Trust Infrastructure

Critical Miss: Cybersecurity and **trust signals** are essential for B2B manufacturing websites handling commercial inquiries.

Security Audit Findings:

Security Element	Current Status	Risk Level
SSL Certificate (HTTPS)	Likely missing	CRITICAL — Google penalizes HTTP sites
Content Security Policy	Absent	XSS attack vulnerability
Secure Contact Forms	Unknown	Data interception risk
Privacy Policy/GDPR	Likely missing	Legal compliance risk
Cookie Consent	Absent	GDPR/CCPA violation risk

Security Hardening Checklist:

- Immediate (This Week)**
 - Install **SSL certificate** and force HTTPS redirect
 - Implement **HSTS** (HTTP Strict Transport Security)

- Add **security headers**: X-Frame-Options, X-Content-Type-Options, Referrer-Policy

2. Short-term (Month 1)

- Create **Privacy Policy** and **Terms of Service** pages
- Implement **cookie consent banner** with granular controls
- Secure contact forms with **reCAPTCHA v3** and **CSRF tokens**
- Conduct **vulnerability scan** (Qualys or Sucuri)

3. Ongoing

- **Quarterly security audits**
- **Automated backups** (daily)
- **Uptime monitoring** (Pingdom or UptimeRobot)
- **Malware scanning** (weekly)

11. Conversion Rate Optimization (CRO) Deep Dive

Original audit touched on CRO but lacked specificity. For B2B manufacturing, CRO requires different tactics than B2C e-commerce .

Current Conversion Barriers:

1. Zero Micro-Conversions

- No “Download Catalog” CTA
- No “Request Free Sample” option
- No “Calculate Project Cost” tool
- No newsletter signup for design trends

2. Friction-Heavy Contact Process

- Likely basic contact form only
- No **live chat** for immediate inquiries
- No **WhatsApp Business** integration (critical for Indian market)
- No **callback request** option

3. Missing Social Proof

- No client project galleries

- No architect/interior designer testimonials
- No “As seen in [Publication]” badges
- No case studies with before/after

CRO Optimization Playbook:

Above-the-Fold Optimization:

Current: Static headline "Who We Are"

Optimized:

- Headline: "Premium Acrylic Panels for Modular Kitchens & Wardrobes"
- Subheadline: "Direct from Manufacturer | 50+ Colors | Delhi NCR & Bangalore"
- Primary CTA: "Request Free Sample Kit"
- Secondary CTA: "Download Technical Specifications"
- Trust badge: "ISO 9001 Certified | 15+ Years Experience"

Product Page Template (New): -

- Hero section:** Product image + 3 key benefits + CTA
- **Technical specs** accordion (thickness, sizes, warranty)
- **Application gallery** (kitchens, wardrobes, commercial)
- **Color selector** (visual swatches)
- **Dealer locator** (map integration)
- **FAQ schema** (structured data)
- **Related products** (cross-sell)
- **Request quote** form (sticky on mobile)

Lead Magnets for B2B:

- “**Complete Guide to Acrylic vs. Laminate**” (PDF download, captures email)
- “**2025 Kitchen Design Trends Report**” (annual industry report)
- “**Acrylic Panel Specification Sheet**” (technical document for architects)
- **Cost Calculator:** “Estimate your kitchen shutter cost”

12. International SEO & Hreflang

Missed Opportunity: If Suraj Wood exports or plans to export, **hreflang implementation** is critical. Even for domestic markets, **language variations** (Hindi, Tamil, Telugu) could open massive markets.

Current State: No international SEO infrastructure detected

Implementation Strategy:

1. Language Targeting (India-focused)

/en/ (English default)
/hi/ (Hindi) – 40% of Indian internet users
/ta/ (Tamil) – Tamil Nadu market
/te/ (Telugu) – Hyderabad/Andhra market

2. Country Targeting (Export markets)

/ae/ (UAE) – Major export market for Indian surfaces
/sa/ (Saudi Arabia) – Growing construction market
/us/ (USA) – NRI market, commercial projects

3. Hreflang Tags

```
<link rel="alternate" hreflang="en-in" href="https://surajwood.com/acrylux/" />  
<link rel="alternate" hreflang="hi-in" href="https://surajwood.com/hi/acrylux/" />  
<link rel="alternate" hreflang="en-ae" href="https://surajwood.com/ae/acrylux/" />
```

13. Email & Marketing Automation Infrastructure

Critical Gap: No audit of **email deliverability** or **marketing automation** capabilities.

Technical Email Audit:

Element	Status	Action Required
SPF Record	Unknown	Verify v=spf1 include:_spf.google.com
DKIM Signing	Unknown	Implement domain key authentication
DMARC Policy	Unknown	Set to quarantine/reject
MX Records	Unknown	Verify proper mail routing
Newsletter System	Absent	Implement Mailchimp/Klaviyo

Automation Workflows to Build:

1. Welcome Series (for catalog downloads)

- Email 1: Deliver download + product overview
- Email 2: Manufacturing process/quality story
- Email 3: Client testimonials/case studies

- Email 4: Dealer locator + consultation offer
 - 2. **Abandoned Inquiry** (for incomplete contact forms)
 - Trigger: Form started but not submitted
 - Email: “Need help choosing the right acrylic panel?”
 - 3. **Post-Purchase** (for B2B dealers)
 - Email 1: Order confirmation + installation guide
 - Email 2: Maintenance tips
 - Email 3: Referral program introduction
-

14. Content Strategy & Topical Authority

Original audit mentioned content but lacked strategic framework.

Content Pillar Strategy for Suraj Wood:

Pillar 1: Product Education (Awareness Stage)

- “Complete Guide to Acrylic Panels for Indian Kitchens”
- “Acrylux vs. ACRYLILK: Which Finish is Right for You?”
- “Understanding Acrylic Panel Thickness: 1mm vs. 3mm”

Pillar 2: Application Guides (Consideration Stage)

- “Modern Wardrobe Design Trends 2025”
- “Commercial Space Design: Hotels, Offices, Retail”
- “DIY Kitchen Renovation: Can You Install Acrylic Panels Yourself?”

Pillar 3: Technical Specifications (Decision Stage)

- “Acrylic vs. Laminate: Cost-Benefit Analysis for Architects”
- “Fire Safety Ratings: Understanding Acrylic Panel Certifications”
- “Installation Guide: Best Practices for Fabricators”

Pillar 4: Industry Trends (Authority Building)

- “The Future of Modular Kitchens in India: 2025-2030”
 - “Sustainable Interior Design: Are Acrylic Panels Eco-Friendly?”
 - “European vs. Indian Manufacturing Standards”
-

UPDATED PRIORITY MATRIX

Priority	Initiative	Impact	Effort	Timeline
P0	HTTPS/SSL Implementation	Critical	Low	24 hours
P0	Core Web Vitals Optimization	High	High	2 weeks
P0	Schema Markup Deployment	High	Medium	1 week
P1	PSEO Template Development	Very High	High	1 month
P1	Analytics/Tracking Setup	High	Medium	1 week
P1	Conversion Optimization	High	Medium	2 weeks
P2	Accessibility Compliance	Medium	Medium	1 month
P2	Content Pillar Creation	High	High	3 months
P2	International SEO	Medium	High	2 months
P3	Marketing Automation	Medium	Medium	1 month

SUMMARY: WHAT YOU MISSED IN ORIGINAL AUDIT

Your original prompt was excellent but missed these **critical audit dimensions**:

1. **PSEO** — The most scalable SEO strategy for manufacturing
2. **Core Web Vitals** — Confirmed ranking factors affecting user experience
3. **JavaScript Rendering** — Technical barrier to indexing
4. **Web Accessibility** — Legal requirement and quality signal
5. **Analytics Infrastructure** — Without measurement, no optimization
6. **Security Hardening** — Essential for B2B trust and rankings
7. **CRO Specifics** — B2B manufacturing requires different tactics than B2C
8. **International SEO** — Hreflang for export markets
9. **Email Deliverability** — Critical for lead nurturing
10. **Content Strategy Framework** — Topical authority building plan

These additions transform the audit from a **basic SEO review** to a **comprehensive digital transformation roadmap** suitable for enterprise-level implementation.

Conclusion

Suraj Wood has **strong product-market fit** but **weak digital-market fit**. The brand competes in a high-intent, high-competition B2B/B2C hybrid market where architects and interior designers research extensively online before specifying materials.

The current website cannot capture this demand. It is invisible to AI search engines, unoptimized for traditional Google search, and provides no conversion mechanisms for qualified traffic.

Priority Action: Immediately implement technical SEO foundation (HTTPS, schema, site structure) while simultaneously launching a fact-dense content strategy targeting “acrylic panels for kitchens India” and related commercial keywords. Without these changes, Suraj Wood will continue to lose market share to better-optimized competitors like Europanell and Royale Touche despite potentially superior product quality.
